

This concentrated anti-foam product quickly knocks down foam in swimming pools, spas and decorative fountains. The special water-based silicone formula prevents foam formation without disturbing water chemistry and without any oily residue.

DIRECTIONS

The product is very concentrated. For swimming pools, add up to 4 ounces at a time directly into pool skimmer or filter intake. Allow pool water to circulate for at least one hour to disperse the anti-foam. If the foaming problems remain, repeat this application.

For spas and hot tubs up to 750 gallons, add 1 to 2 ounces of anti-foam directly to the water. If foaming still occurs after 24 hours, repeat this application.

For decorative fountains, use 2 ounces per 10,000 gallons of water in the system. For extreme foam problems due to detergent contamination, repeat treatment until control is evident.

POOL ANTI-FOAM CONCENTRATE

FOAM CONTROL AGENT
FOR POOLS, SPAS and FOUNTAINS

CAUTION

May irritate eyes. See side panel for further cautions and first aid instructions.

KEEP OUT OF REACH OF CHILDREN

Sold By:

CAUTION

May irritate eyes.
