

This surfactant is a specially formulated spreading and wetting agent designed to increase the effectiveness of agricultural chemical sprays. It reduces the surface tension of fertilizer and pesticide solutions, allowing them to penetrate into the soil quickly, for less run-off and waste. The great wetting action also assures even and thorough coverage of foliage and reduced wash-off of expensive chemicals. Proper use of this surfactant will provide optimum performance and cost effectiveness of agricultural chemical applications.

DIRECTIONS

Add 1 gallon of surfactant per 1000 gallons of mixed spray solution, or follow the manufacturer's recommendations on the chemical label.

SURFACTANT

**WATER SOLUBLE SPREADER
AND WETTING AGENT**

**INCREASES THE
EFFECTIVENESS OF FERTILIZERS,
HERBICIDES, INSECTICIDES,
FUNGICIDES, IRON AND
MICRONUTRIENT SOLUTIONS**

CAUTION

May irritate eyes. See side panel for further cautions and first aid instructions.
