

GENERAL PURPOSE POWDERED DETERGENT

This high sudsing alkaline detergent provides excellent cleaning performance even in hard water. It contains special phosphate builders and non-ionic surfactants to cut through greasy grime with a minimum of effort. This general purpose formula is safe to use on almost all surfaces, including wood, plastics, metal and painted surfaces.

DIRECTIONS

Use 2 to 6 ounces of detergent powder per gallon of water. For best results, use warm or hot water. Mop, sponge or spray solution on the surface to be cleaned and agitate if necessary to remove stubborn stains. Rinse surface thoroughly with clean water. Use this detergent with care on finished floors, as some floor finishes are not detergent resistant and may be removed by this cleaner.

HEAVY DUTY - MULTI-PURPOSE

HIGH SUDS EVEN IN HARD WATER

FREE-RINSING

BIODEGRADABLE
