

CAUTION:

May be harmful if swallowed. May be irritating to eyes and skin. Do not take internally. Avoid contact with eyes and prolonged contact with skin.

FIRST AID:

If In Eyes: Flush eyes and under eyelids with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical assistance.

If Swallowed: Do not induce vomiting. Give 1-2 glasses of water to dilute. Obtain medical assistance. Never give anything by mouth to an unconscious person.

If On Skin: Flush skin with water. Remove contaminated clothing, and continue flushing. If irritation persists, obtain medical assistance.

If Inhaled: Remove person to fresh air.

See M.S.D.S. for complete safety information.

KEEP OUT OF REACH OF CHILDREN

HANDLING AND STORAGE:

Keep container tightly closed when not in use. Do not store in unmarked containers. Store container in cool, dry place. Store away from alkaline products, metals, salts, organics, and reducing agents.

NET CONTENTS: One Gallon (3.79L)

DESCRIPTION

Using the power of hydrogen peroxide and the cleaning ability of d-Limonene **HYDRO POWER Concrete Cleaner** is the next generation in cleaning. There are many "oxygen-based" cleaners on the market these days, but **HYDRO POWER Concrete Cleaner** is different. This product line is specifically formulated at a higher pH than other cleaners. Hydrogen peroxide is more active at a higher pH, which means better cleaning and stain removing properties than the other market brands. This higher pH also allows the d-Limonene and surfactants to work better.

HYDRO POWER Concrete Cleaner removes some of the toughest stains from concrete. Oil stains that have been in concrete for years are magically lifted towards the surface and easily rinsed away with water.

DIRECTIONS

For severe oil staining and heavy grease, use undiluted and pour or spray directly on the stain. Allow it to penetrate for 5 to 10 minutes until deposits are loosened. Rinse concrete with clean water.

For lighter soils and stains dilute with 5 parts water, allow solution to penetrate for 5 to 10 minutes until deposits are loosened. Rinse concrete with clean water.
