DESCRIPTION

Keeps odors down, reuses cleaner water and reduces costly pump outs of your oil/water separator. This concentrated cleaner and degreaser was designed to efficiently clean trucks and equipment. After removing greases and oils from equipment the special "cleavable" surfactants actually release the grease and oil that just removed from the trucks or equipment. Because it does not keep these greases and oils emulsified, it lets go of them when the rinse water enters the oil/water separator. This allows for more efficient use of cleaner water, reduces the need to pump out the grey water tank and reduces odors.

Using this product in combination with Bio-Blast HCB, the bacterial concentrate designed to degrade petroleum hydrocarbons, will ensure you're doing everything to keep your facility environmentally responsible.

DIRECTIONS

Inject 2 to 8 ounces per gallon of water into the wash system. Wash trucks and equipment normally allowing the rinse (grey) water to collect through the oil/water separator. The oil and grease in the grey water will rise to the top of the oil/water separator where it can be skimmed off and removed.

To help further eliminate the greases and oils inject Bio-Blast HCB into a nearby floor drain or directly into the oil/water separator with a pump and timer system during a period of slowest flow.

CAUTION

May irritate eyes. Avoid contact with eyes.

FIRST AID

If In Eyes: Flush eyes and under eyelids with plenty of cold water for at least 15 minutes. If irritation persists, obtain medical assistance.

If On Skin: Wash with soap and water. Remove contaminated clothing and launder separately before reuse. If irritation persists, obtain medical assistance.

If Swallowed: Contact physician or poison control center immediately. Give affected person 1 to 2 glasses of water. Do not induce vomiting. Never give anything to an unconscious person.

If Inhaled: Remove person to fresh air.
