

Foaming Root Be Gone

SEWER & SEPTIC ROOT REMOVER

ROOT BE GONE is effective in removing roots from septic and sewer lines, lift stations, drain fields, and other areas where roots have invaded the water lines. ROOT BE GONE is safe to use when as directed and works quickly and effectively. Directions: Liquid: Add 1-2 gallons per 500 gallons of water depending on the amount of root intrusion discovered. Crystal: Add 3-6 lbs per 500 gallons of water. Allow to flow through the area with root intrusion. Add when the flow of water is at its slowest to allow time for plants to absorb the solution of ROOT BE GONE. For heavy intrusion, double the dosage to increase its effectiveness. Add every 2-3 months to control root intrusion.

Specimen Label

KEEP OUT OF REACH OF CHILDREN

May cause irritation to eyes and skin. Do not allow contact with eyes or skin. If contact occurs, rinse with water for 15 minutes. If irritation persists. Do not ingest. Contains water, detergents & cleaners.

 Protective Equipment: It is recommended that safety glasses and rubber gloves be worn when using industrial strength cleaners

FOAMING FORMULA

Specimen Label

NON-TOXIC: This material has a low order of toxicity and is not considered hazardous as defined by USDL Safety and Health Regulation (29 Section 1501.2) **INGESTION:** Give 8 to 16 ounces of water to dilute substance. Call a physician or local Poison Control Center immediately. Never give anything by mouth to an unconscious person.
EYES: Flush eyes with water for at least 15 minutes. If irritation persists, call a physician.
SKIN: If skin becomes irritated, rinse with water.
INHALATION: If symptoms of over exposure develop, remove to fresh air.
NON-CORROSIVE: Will not induce corrosion of ferrous metals
NON-POLLUTING: Environmentally friendly in that the product contains no highly toxic solvents and that the surfactants contained are considered 95% biodegradable as determined by the Shake Flask Test.
NOTE: Do not use on floors. Avoid contact with eyes and mucous membranes.
